Инструкция для Терминала HN-T17

1. Описание документа

1.1. Цель этого руководства

Данное руководство является руководством пользователя системы Digital Evidence Management System, чтобы помочь оператору программного обеспечения быстро и удобно использовать эту систему.

Предполагаемые читатели этого руководства - конечный пользователь, системный администратор, специалисты по установке и обслуживанию системы.

1.2. Область применения

Данное руководство предназначено для конечного пользователя системы управления. Мы предполагаем, что пользователь, обладающий базовыми навыками работы на компьютере, знаком с операционной средой Windows и освоил основные методы работы с программным обеспечением и базовое использование браузера Internet Explorer.

1.3. О структуре

Эта инструкция состоит из документации, системных настроек и работы системного функционального модуля. Для пользователей есть подробное описание использования этой системы во второй главе, пожалуйста, внимательно прочитайте ее перед использованием.

2. Системные настройки

Включите Терминал в сеть питания 220В, и подключите Терминал к USB разъему ПК.

2.1. Настройка места для хранения

Если вы устанавливаете программу в первый раз, пожалуйста, укажите место для хранения программы (по умолчанию: Диск Е).

Первый шаг: введите пароль

(по умолчанию: администратор "admin" и первоначальный пароль: 888) Введите логин пользователя и пароль.

Примечание: если на вашем компьютере нет диска Е, выберите другой диск.

2.2. Удаление файлов

А. Система док-станции удалит самый старый файл, когда на вашем компьютере нет свободного места. Терминал может удалить несколько файлов.

Б. Автоматическая очистка файла.

Система удалит все просроченные файлы и освободит намного больше памяти, когда произойдет событие. Дату можно установить в базовой функции информатизации.

4.5. Записать видео файла на CD/DVD диск

Если вы хотите использовать эту функцию, вам нужно проверить, есть ли на вашем ПК DVD-привод для перезаписи.

4.6. Импорт файлов

Вы можете импортировать видеофайлы в базу данных. Система может управлять другими видеофайлами, хранящимися на вашем ПК, но не загруженные терминалом.
